

SPRAYDET® RS

Power Spray Wash Rust Cleaner and Stripper. SPRAYDET® RS is a highly alkaline powdered cleaner and rust stripper for use in power spray wash cabinet or conveyor systems, or other highly agitated hot water systems.

SPRAYDET® RS

- ▶ Premium product for removal of difficult grease and oil deposits, and stubborn carbon deposits.
- ▶ Provides one-step removal of rust and soil, eliminating acid pickling, neutralizing and extra rinsing steps.
- ▶ Preserves part dimensions, as the base metal is not attacked.
- ▶ Safe and effective on all ferrous metals.
- ▶ Contains non-silicon defoamers to destroy foam at operating temperatures (above 140°F).
- ▶ Effective in hard or soft water.
- ▶ Contains no deposit-forming silicates.

Use Instructions

Add water to tank first!

For routine cleaning in pressure spray wash cabinets with continuous spray systems, add ½ to 8 oz. of cleaner per gallon of system water. For full rust stripping capabilities, use at levels of 8 to 24 oz/gallon of water based upon observed results. Put product onto the floor of a preheated cabinet, close door and operate sprayers for a few minutes to dissolve the detergent. If adding to an opened tank, add slowly to the surface of luke-warm water with agitation to avoid spattering.

Operate solution at 140°F-210°F. After cleaning, rinse parts with fresh water.

To maintain correct product levels through extended periods between system water changes use the C&H Titration Test Kit.

Technical Data

Form	Powder
PH (use solution)	13–13.5
Color	Tan
Storage Stability	Excellent, Keep Dry
